

TOPICAL SKIN NUTRITION by **OXANGO**
MINERAL TREATMENT

Frequently Asked Questions

What makes Glimpse Mineral Treatment different from other Mineral Products currently available?

Our mineral treatment is designed to be the 5th step in your Glimpse regimen. BioActive X³ and a microfine Pericarp Peel Powder work in harmony with Zinc Oxide, Oat Protein Powder, Chelated Minerals, and our exclusive GemStone Energizing Complex to give you protected radiant skin. Unlike many mineral products currently available, our formula is free of Titanium Dioxide, Silicone, and Parabens and provides your skin with pure protection from environmental assaults with our uncoated Zinc Oxide and active botanicals.

How can I use my mineral treatment?

The versatility of this formula is another reason it is truly unique, you may apply the formula as a powder either over your favorite Glimpse moisturizer or to set a traditional foundation. You may also create your own luminizing foundation by mixing the Glimpse Mineral Treatment with either the Glimpse Moisturizing Cream or the Pericarp Oil.

Can this be used with my current makeup or can it replace it?

This amazing formula may be used either with your current makeup or you may decide to use our Mineral Treatment in place of your traditional foundation. Our feather-light powder beautifully enhances your skin while providing flawless sheer coverage with one application and you may build to medium coverage with multiple applications.

Can men use this formula?

Definitely, our clean formula provides environmental protection to the entire family. It is very easy to use and will not sting your eyes or come off on your clothing.
