

XANGO's Brand Evolution ***From Obscure Purple Fruit to Billion Dollar Brand***

From bringing the mangosteen out of obscurity in Southeast Asia to global mass distribution, health and wellness leader XANGO, LLC is the first company to market a premium mangosteen beverage, XANGO® Juice. Today, its portfolio also includes products offering topical skin nutrition and restoration of youthful vigor.

In 2002, privately owned global nutrition company XANGO started with 14 employees in the United States and today operates in 34 countries and territories with approximately 500 employees. One million distributors participate in XANGO's global network, including operations in the United States, Mexico, Canada, Malaysia, Germany, Australia, Japan and other international markets. XANGO® Juice, its flagship offering, delivers a concentration of nutrients that contribute to a healthy immune system, respiratory system, cardiovascular system and supports cartilage and joint function.

In the spring of 2008, XANGO continued its mangosteen category domination by expanding its roster of premium, functional products with the introduction of the XANGO 3SIXTY5™ whole food nutrition multi-vitamin brand. Utilizing chelated technology, driving increased absorption, and combining the mangosteen rind with botanical phytonutrients from 12 fruits and 12 vegetables, the 3SIXTY5 whole food formula provides a complete blend of vitamins, minerals, essential fatty acids and coenzyme Q10 (CoQ10) to fully complement a daily dose of globally renowned XANGO® Juice.

XANGO introduced Glimpse® Topical Skin Nutrition in November 2008. This innovative personal care brand features three exclusive, xanthone-rich ingredients from the mangosteen delivered through a proprietary BioActive X³ Complex™ that uses toxin-free ingredients and green chemistry technology. Glimpse is available in two product systems – one providing nutrition for normal to dry skin and the other designed for normal to combination skin.

Most recently, XANGO launched eleviv™, an innovative product that supports natural vigor with active ingredients including Eurycoma longifolia extract, citrus peel extract, L-Theanine and green tea extract. Scientifically formulated and supported by a series of credible peer-reviewed studies, eleviv helps balance metabolic levels leading to optimal vigor, enhanced mood, stress relief and more restful sleep. It is designed to complement XANGO® Juice for mental and physical well-being.

As the category leader, XANGO continues to be the forerunner with other initiatives such as:

- Mangosteen research – With scientific partners that include Northridge, Calif.-based Medicus Research and Ogden, Utah-based Weber State University, XANGO is spearheading the scientific exploration of the whole mangosteen fruit through a tiered approach based on **safety, standardization and efficacy**.

In a study published in the June 2007 issue of the *Journal of Separation Science* and in accordance with Association of Analytical Communities (AOAC) protocol, researchers established a standard scientific method for testing and measuring the nutrient-rich xanthonenes found in the mangosteen.

XANGO also released preliminary results from a separate bioavailability study of xanthonenes and XANGO Juice that indicated usage of the whole mangosteen fruit as a delivery vehicle leads to high xanthone absorption. This pre-clinical trial showed that unnaturally elevated levels of xanthone consumption through extracts (used by competing brands) were shown to result in decreased absorption efficiency.

Credible, third-party and world-renowned institutions are engaged in more extensive human clinical trials on XANGO Juice. For instance, in 2009, Jay Udani, MD, CPI – founder, CEO and Medical Director of Medicus Research – conducted a **double-blind placebo-controlled human clinical trial that demonstrated XANGO Juice’s ability to reduce inflammation levels and to improve weight and body fat in an overweight population.** These results may have implications in future efforts to address cardiovascular disease and diabetes, though longer studies are needed. XANGO Juice was shown to be safe at all dosages tested.

- XANGO Goodness – This worldwide cause-related movement mobilizes XANGO’s global resources to better the lives of others through philanthropic action. XANGO corporate partners, distributors, employees and consumers participate by giving their time and money to sustainable efforts that serve and support children, families and communities. XANGO partners with respected charities in North America, Australia, Asia and South America to fully support global humanitarian needs. In Fall 2009, the XANGO Goodness Foundation will officially launch as a 501(c)(3) charity.
- Landmark jersey-front sponsorship – XANGO expanded its brand presence through a landmark jersey-front title sponsorship deal with Major League Soccer and Real Salt Lake, the first of its kind in major league U.S. professional sports. As part of the sponsorship, XANGO built and donated a practice facility for Real Salt Lake, located on XANGO’s Utah campus.
- XANGO.TV – In the fall 2007 XANGO continued its leadership in the direct selling industry with the launch of XANGO.TV. As the first brand-centric video sharing site in the space, XANGO.TV is dedicated to broadcasting the XANGO lifestyle by providing visitors an inside view of the real-life stories, insights and experiences from millions of distributors and consumers worldwide. Hosting a library of videos and podcasts, XANGO.TV chronicles the company’s genesis as a category creator to its advent as an evolving global billion-dollar brand.
- Recognition – XANGO’s success, driven by the founders’ vision, has been recognized on numerous fronts such as:

- 2009 *PR News* recipient for “Overall Leader in CSR Practices for Companies with Fewer than 1,000 Employees”
- From 2004 through 2008, XANGO’s founders recognized as part of *Utah Business Magazine’s* annual "Forty Under 40" award list
- Virgo Publishing’s 2008 inaugural “Focus on the Future” Humanitarian Award
