

## Product Profile: Glimpse® Mineral Treatment

With Glimpse® Mineral Treatment you will experience topical skin nutrition and flawless coverage with our triple milled blend of pure minerals. Applied wet or dry, our extraordinary Mineral Treatment instantly infuses your skin with energy, increasing clarity and luminosity. BioActive X<sup>3</sup> Complex, in harmony with zinc oxide, oat protein powder, silk powder, bio-chelated minerals and our Energizing Gemstone Complex, work together to naturally enhance your skin while diminishing the appearance of fine lines and minimizing the appearance of pores. Protect your skin, guard your health and benefit our planet with our perfect blend of nature.

### **Glimpse™ Mineral Treatment Features:**

**BioActive X<sup>3</sup> Complex™** – Three exclusive, proprietary ingredients derived from the nutrient rich mangosteen pericarp compose the BioActive X<sup>3</sup> Complex, providing a performance-driven, xanthone-rich complex to nourish and revitalize skin. These three active complexes work together. Through in-vitro testing, BioActive X<sup>3</sup> Complex has been shown to help improve the structure of the skin and protect the skin against various environmental conditions. Additional in-vitro testing shows that BioActive X<sup>3</sup> Complex also offers greater antioxidant potency than Vitamin C, Resveratrol, CoQ10, green tea, catechins and astaxanthin.

**Zinc oxide** – An element essential for healthy skin, zinc oxide soothes stressed skin while providing protection against environmental factors. Our treatment is formulated with uncoated zinc oxide (versus coated zinc oxide) because of its greater benefits, which include calming sensitive/irritated skin, reducing inflammation and provides chemical-free physical environmental protection. Additionally, zinc enhances barrier repair and exhibits powerful antioxidant properties.

**Mica** – Mica is a transparent mineral. Due to the sheer, translucent and skin blending effect of the mica mineral, your natural skin tone shines through when you use our transforming Mineral Treatment. Weightless on your skin, fine lines are softened, and skin texture appears more even and clearer.

**Energy Gemstone Complex with Topaz and Pearl** – Developed exclusively for Glimpse, our Gemstone Energizing Complex infuses your skin with energy, increasing luminosity and radiance. This hydrating complex protects your skin while combating the signs of aging revealing brighter, revived, and softer looking skin.

**Silk powder** – Our silk powder nourishes the skin while improving radiance and luminosity. Containing a host of amino acids, the powder supports your skin's natural moisturization process and forms a healthy barrier to defend against environmental effects.

**Bio-chelated minerals** – Includes Zinc Ferment, Copper Ferment, Magnesium Ferment, and Coral Calcium Ferment. Minerals play a key role in overall health and well being. Unlike

vitamins, not a single mineral can be synthesized within the human body. Without minerals many enzymatic reactions could never take place. Each mineral contained within our exclusive mineral blend is essential in maintaining healthy skin.

**Benefits of Glimpse Mineral Treatment include:**

- Ideal for any skin type including sensitive skin
- Used in conjunction with Glimpse Skin Care System, calms the signs of inflammation
- Protects skin from environmental factors
- Topical antioxidant protection
- Provides natural, sheer coverage with dry application
- Provides luminous, medium coverage with wet application
- Calms and soothes the skin
- Provides SPF 25/PA+++

Glimpse Mineral Treatment comes in four shades: Light, Medium, Deep and Sheer. Each 9g/0.3 oz unit is available separately or can all be purchased together in the Mineral Treatment Pack.

The XANGO Mineral Treatment is designed to be used both for a dry and wet application. Apply a small amount of the dry Mineral Treatment powder with a brush for desired coverage. For a wet application, combine the Mineral Treatment with Mangosteen Pericarp Oil or Glimpse Moisturizers to create a hydrating creamy foundation; apply with a wet foundation brush and apply more powder, if necessary, for desired coverage.
