A WELLNESS PLAN WITHOUT WEAKNESS

A PROBLEM OF EPIDEMIC PROPORTIONS

Two out of three American adults are overweight or worse. The issue of weight on wellness is becoming an epidemic.

One indicator of the seriousness of the problem is the amount of money we're willing to spend on weight loss. It's become a billion-dollar industry, encompassing everything from extreme workout routines to fad diets to "silver-bullet" pills. But none of them can deliver what everyone wants: long-term results.

Here's the issue: The problem is comprehensive, and the solutions are not. We gain weight when we lead increasingly sedentary lives and eat bigger portions of less-healthy food. There can't be a quick fix to correct such fundamental problems.

But XANGO has developed a better way: the FAVAO way.
